Summary

Data Engineering student specializing in building scalable data architectures and automated ETL/ELT pipelines. Experienced in implementing Medallion architectures using Spark, Iceberg, and Airflow, as well as enterprise-grade Data Warehousing with the Microsoft SQL Server stack. Proficient in Kimball dimensional modeling and incremental loading strategies. Passionate about architecting data intelligence to drive high-performance analytical insights.

Education

Ho Chi Minh City University of Technology and Engineering (HCM-UTE) HCMC, Vietnam
Bachelor of Engineering in Data Engineering | Current GPA: 8.41/10.0 Sep 2023 – Expected 2027

- Awarded Semester 1 – Year 1 Scholarship for Academic Excellence (GPA 8.79/10.0).
- Core Coursework: Database Systems, Data Structures & Algorithms, Data Warehouse, Big Data Analytics, Distributed Systems, Software Engineering, OOP.

Technical Skills

- **Data Engineering:** Apache Spark (PySpark), Apache Iceberg, Delta Lake, Trino, MinIO (S3), Hive Metastore.
- **ETL/Orchestration:** Apache Airflow, SQL Server Integration Services (SSIS), MS SQL Server, PostgreSQL.
- **Analytics & BI:** SQL Server Analysis Services (SSAS - OLAP), Power BI (DAX), Superset, Kimball Methodology.
- **Tools & Infrastructure:** Docker, Linux, Git/GitHub, Agile/Scrum (Plane.so), Prompt/Context Engineering.

Experience

Teaching Assistant – Database Systems HCMC, Vietnam
Ho Chi Minh City University of Technology and Engineering (HCM-UTE) Oct 2025 – Present

- Assisting in teaching relational database design (ERD), normalization, and SQL optimization for 200+ students.
- Guiding students in implementing complex queries and understanding internal database execution plans.

Freelance Business Analyst & Software Planner Remote
Requirement Management & Documentation Jul 2025 – Present

- Elicited technical requirements and drafted Data-focused Requirement Documents for diverse clients.
- **Key Projects:** Din Ky Restaurant Management (Inventory Data Flow), B2B Pharmacy E-commerce.

Projects

Healthcare Data Lakehouse: COVID-19 Analytics Spark, Iceberg, Airflow, Trino, MinIO
Lead Data Engineer | [GitHub](#) | [Plane.so](#) March 2026 – April 2026

- Architected a decoupled Data Lakehouse environment using Docker to process 100K+ simulated patient records.
- Engineered the Medallion Architecture (Bronze layer) using Apache Spark to write data in Apache Iceberg format, ensuring ACID compliance and schema evolution.
- Designed automated batch ingestion pipelines via Airflow from PostgreSQL to MinIO, and configured Trino as a distributed SQL engine for high-speed analytical serving.

Olist E-Commerce Lakehouse Spark, Delta Lake, Airflow, Superset, MinIO
Lead Data Engineer | [GitHub](#) | [Plane.so](#) March 2026 – April 2026

- Built a Medallion Architecture (Bronze, Silver, Gold) on a Dockerized Spark cluster to process 100K+ records.
- Implemented automated ETL pipelines with Airflow, transforming raw data into Delta Lake format on S3 (MinIO) with Hive Metastore for SQL-based management.
- Developed the Gold layer for customer segmentation (RFM analysis) and sales views to support high-performance BI.

Airline Operations & Asset Health Data Warehouse SQL Server, SSIS, SSAS, Power BI
Project Lead & Data Architect | [GitHub](#) | [Plane.so](#) March 2026 – April 2026

- Implemented a Kimball Lifecycle Data Warehouse correlating 2015 U.S. flight logs with technical FAA Registry data.
- Developed a robust SSIS ETL pipeline with Incremental Loading (Watermark logic) and SCD Type 2 management for asset technical specifications.
- Designed an SSAS Multidimensional Cube (OLAP) with Fact grains for Financial Loss, Delay Root Cause, and Ground Turnaround Efficiency to provide sub-second analytical querying.

Leadership & Activities

HCMUTE RTIC (University Academic Club) | Facebook

Vice Leader and Co-Founder

HCM City, Vietnam

May 2025 – Present

- Leading academic initiatives and managing internal technical projects: *hcmutertic.com Web Hub* (Lead BA/BE), and *HCMUTE Wellness App* (BA/FE).
- Coordinating technical workshops and mentoring members in algorithm design and server management.

Certifications & Awards

- **Hackathon FIT-HCMUTE 2025:** Consolation Prize
- **AWS Academy Graduate:** Data Engineering | Cloud Web App Builder | Cloud Foundations.
- **Google Career Certificates:** AI Essentials | Crash Course on Python.
- **Gemini Certified Student | Scholarship for Academic Excellence** (Semester 1 - Year 1).
