Summary

Dedicated Data Engineering student with a solid academic foundation and practical experience in business analysis. Skilled in building automated pipelines, optimizing relational models, and designing data-centric architectures. Seeking a Data Engineering Internship/Fresher role to contribute and grow toward a professional Data Engineer.

Education

Ho Chi Minh City University of Technology and Engineering (HCM-UTE)

HCMC, Vietnam

Bachelor of Engineering in Data Engineering | Current GPA: 8.41/10.0

Sep 2023 – Expected 2027

- Awarded Semester 1 – Year 1 Scholarship for Academic Excellence (GPA: 8.79/10.0).
- Core Coursework: Database Systems, Data Warehouse, Big Data Analytics, Cloud Computing.

Technical Skills

- **Storage / DWH / Lakehouse:** Google BigQuery, Delta Lake, MinIO (S3), PostgreSQL, Supabase.
- **Data Processing & Languages:** Python, SQL, Apache Spark (PySpark), Pandas.
- **Orchestration & Integration:** Apache Airflow, Airbyte, n8n, Larksuite API.
- **Analytics & BI:** Looker Studio, Apache Superset.
- **Infrastructure & Tools:** Docker, Git, Agile/Scrum.

Experience

Data Engineer Intern

HCMC, Vietnam

AURA GROUP

Apr 2026 – Jun 2026

- Researched and mapped the enterprise data flow from sources (Supabase, Larksuite) through Airbyte, Airflow, and BigQuery to n8n and Google Sheets to support the design of a new ERP system.
- Created technical documentation and designed dashboard wireframes to visualize key business metrics.

Freelance Business Analyst & Software Planner

Remote

Requirements Management & Technical Documentation

Jul 2025 – Present

- Collaborated with clients to analyze business processes, gather requirements, and draft software documents.
- Designed specifications and data flows for banthuocsi.vn and dinkybinhduong.vn.

Leadership & Activities

HCMUTE RTIC (University Academic Club)

HCMC, Vietnam

Vice Leader & Co-Founder

May 2025 – Present

- Co-founded the academic club, leading student technical teams and organizing hands-on software workshops.
- Served as Business Analyst and Developer for hcmutertic.com and 25nam.fit.hcmute.edu.vn.

Projects

Vietnamese Banking Financial Analytics

Python, BigQuery, TensorFlow, Scikit-learn, Looker Studio

[GitHub](#) | [Dashboard](#)

May 2026 – June 2026

- Designed and implemented a Star Schema on Google BigQuery, reducing data aggregation and reporting time by 80%.
- Trained a Random Forest model for credit risk warning achieving an AUC-ROC of 0.9752 and 91.67% Recall.
- Developed multivariate LSTM for rolling short-term stock forecasting.
- Connected BigQuery to Looker Studio and Streamlit to build live dashboards visualizing CAMELS metrics.

Olist E-Commerce Lakehouse

PySpark, Delta Lake, Airflow, Superset, MinIO

[GitHub](#) | [Task Management](#)

Jan 2026 – Apr 2026

- Built a local Medallion-architecture Lakehouse (Bronze, Silver, Gold) in a Dockerized environment using MinIO (S3).
- Implemented PySpark ETL scripts to ingest raw CSV datasets and load them as ACID-compliant Delta Lake tables.
- Orchestrated daily batch pipelines using Apache Airflow and cataloged tables with Hive Metastore and PostgreSQL.
- Calculated customer RFM metrics in the Gold layer and visualized results on Apache Superset.

Certifications & Awards

- **AWS Academy Graduate:** Data Engineering | Cloud Web App Builder | Cloud Foundations.
- **Certificates & Awards:** Google AI Essentials & Python | FIT-HCMUTE Hackathon 2025 Consolation Prize.
