## Summary

I am a passionate Data Engineering student with a solid academic foundation and practical experience as a freelance BA. I enjoy building pipelines and organizing data. I am eager to learn and implement modern concepts like Data Platforms, Data Mesh, and "Data as a Product". I am seeking a Data Engineering Internship/Fresher position to contribute and grow toward a Senior Data Engineer role.

## Education

**Ho Chi Minh City University of Technology and Engineering (HCM-UTE)**

HCMC, Vietnam

*Bachelor of Engineering in Data Engineering | Current GPA: 8.41/10.0*

*Sep 2023 – Expected 2027*

- Awarded Semester 1 – Year 1 Scholarship for Academic Excellence (GPA 8.79/10.0).
- Core Coursework: Database Systems, Data Structures & Algorithms, Data Warehouse, Big Data Analytics, Software Engineering, Cloud Computing.

## Technical Skills

- **Storage / OLAP / OLTP:** MinIO (S3), Delta Lake, Apache Iceberg, MS SQL Server, PostgreSQL.
- **Data Processing:** Apache Spark (PySpark).
- **Data Orchestration & Observability:** Apache Airflow, SQL Server Integration Services (SSIS).
- **Analytics:** Trino, SQL Server Analysis Services (SSAS), Power BI, Apache Superset.
- **Infrastructure & Methodologies:** Docker, Linux, Git, Kimball Modeling, Agile/Scrum, Prompt Engineering.

## Experience

**Teaching Assistant – Database Systems**

HCMC, Vietnam

*Ho Chi Minh City University of Technology and Engineering (HCM-UTE)*

*March 2026 – April 2026*

- Assisting in teaching relational database design (ERD), normalization, and SQL for 200+ students.
- Guiding students to write queries and understand how databases execute them.

**Freelance Business Analyst & Software Planner**

Remote

*Requirement Management & Documentation*

*Jul 2025 – Present*

- Worked directly with clients to understand their business needs and drafted clear technical requirements.

## Projects

**Healthcare Data Lakehouse: COVID-19 Analytics**

Spark, Iceberg, Airflow, Trino, MinIO

[GitHub](#) | [Plane.so](#)

*Jan 2026 – April 2026*

- I deployed a local Data Lakehouse using Docker, Spark, and MinIO to process 100K+ patient records.
- I improved my understanding of ACID properties on Data Lakes via Iceberg and fast serving via Trino.

**Olist E-Commerce Lakehouse**

Spark, Delta Lake, Airflow, Superset, MinIO

[GitHub](#) | [Plane.so](#)

*Jan 2026 – April 2026*

- I built automated pipelines with Airflow to transform data into Delta Lake and created an RFM dashboard.
- I improved myself at PySpark, scheduling with Airflow, and visualizing "Data as a Product" via Superset.

**Airline Operations & Asset Health Data Warehouse**

SQL Server, SSIS, SSAS, Power BI

[GitHub](#) | [Plane.so](#)

*Jan 2026 – April 2026*

- I designed a Kimball Data Warehouse and built an ETL pipeline with SSIS to process flight logs.
- I improved my ability to handle SCD Type 2, incremental loading, and pre-calculating metrics using SSAS.

## Leadership & Activities

**HCMUTE RTIC (University Academic Club)**

HCMC, Vietnam

*Vice Leader and Co-Founder*

*May 2025 – Present*

- Leading academic initiatives and teamwork for internal projects.
- Coordinating technical workshops and helping junior members.

## Certifications & Awards

- **AWS Academy Graduate:** Data Engineering | Cloud Web App Builder | Cloud Foundations.
- **Hackathon FIT-HCMUTE 2025:** Consolation Prize.
- **Google Career Certificates:** AI Essentials | Crash Course on Python.
- **Scholarship for Academic Excellence** (Semester 1 - Year 1).
